This permit is issued subject to all prior rights and with the understanding that the applicant company will install and maintain during the grazing season from May 1st. to October 51st of each year, so long as they shall continue milling operations necessitating their use of the waters of the springs, four watering troughs to be located at the following points:

Each of the watering troughs so to be installed by them to be equipped with a floating valve, so as to insure an adequate supply of water at all times without waste.

It will, of course, be understood that such user on the part of the cattlemen shall not endow them with any right or interest in the pipeline or water works installed by the mining company for milling purposes, and that there will be no interference by the cattlemen with any of the mining company's equipment, their rights in the premises to be confined to the use of the water without claim of ownership as to any of the property installed by the mining company for its transportation and use.

It is further understood that the <u>O.5</u> Cubic foot of water per second herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to a beneficial use. A suitable measuring device must be installed and accurate measurements of the water placed to a beneficial use must be included in the proof of such use when filed. The State reserves the right to regulate the use of the water herein granted at any and all times.
